PAVING WORK ON I-293 IN MANCHESTER WILL REQUIRE LANE SHIFTS
WESTBOUND BETWEEN SOUTH WILLOW STREET AND BROWN AVENUE

The New Hampshire Department of Transportation announces paving operations on Interstate 293 westbound in Manchester will require traffic lane shifts on Thursday, October 7 and Tuesday, October 12, 2004.

This paving work will occur between Exit 2 (South Willow Street) and Exit 1 (Brown Avenue). Two lanes of traffic will be maintained westbound on I-293 during the pavement grinding and repaving work. Motorists should be alert to the lane shifts for approximately two miles.

This work is part of a \$13 million project that includes pavement rehabilitation and widening of I-293 between Exit 1 and Exit 2, and the rehabilitation of four bridges over Brown Avenue and Frontage Street. George Cairns and Sons, Inc. of Londonderry, New Hampshire is the general contractor.
